

DM Website Process and Analyze Pages

This is the home page of the Process and Analyze webpage content project.

Participant List: [Participant List](#)

Team Meeting notes: [DM Website Process and Analyze Team Meetings](#)

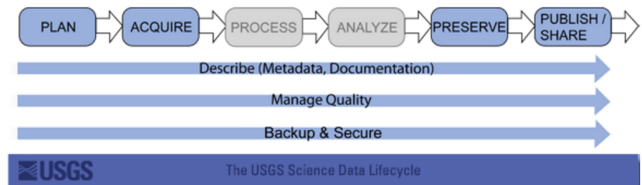

See the [File List](#) page for various files related to the project (web page templates, presentations, etc.).

Contact Team co-leads: [Steve Tessler](#) (stessler@usgs.gov) and [Michelle Chang](#) (mchang@usgs.gov)

Project Team Calendar

We will host biweekly 1 hour discussions and team writing meetings. The work should be completed by the end of May.

Help us add some content!

The [USGS Data Management Website](#) provides non-prescriptive information on data and information management throughout the USGS Science Data Lifecycle.

However, the website does not have any pages dedicated to the PROCESS and ANALYZE stage of the data lifecycle (*really important steps within a scientific study*).

How do you Process and Analyze data?

What are the fundamental steps in any project?

What are a few best practices you've picked up along the way?

Join our team to create high level pages for these important steps and bring your expertise and knowledge to share!
